

**Dosage Chart for Infants:**  
**Acetaminophen** (Little Fevers, PediaCare, Tylenol)  
**Ibuprofen** (Advil, Motrin, PediaCare)

Weight Lbs. & kg.	Acetaminophen			Ibuprofen		
	Total Dose Needed in mg	Brand name	Total Amount needed in ml	Total Dose Needed in mg	Brand name	Total Amount needed in ml
12~17 lbs. (5.5~7.7 kg)	80 mg	Little Fevers & PediaCare <i>Infant</i> Fever/Pain Reliever 160 mg/5.0 ml	2.5 ml Syringe	50 mg	<i>Infants'</i> Advil & Motrin & PediCare  50 mg/1.25 ml	1.25 ml Syringe
		© <i>Infants'</i> Tylenol 160 mg/ 1.6 ml	0.8 ml Dropper			
18~23 lbs. (8.2~10.5 kg)	120 mg	Little Fevers & PediaCare <i>Infant</i> Fever/Pain Reliever 160 mg/5.0 ml	3.75 ml	75 mg	<i>Infants'</i> Advil & Motrin & PediCare  50 mg/1.25 ml	1.865 ml Syringe
		© <i>Infants'</i> Tylenol 160 mg/ 1.6 ml	1.2 ml Dropper			
24~35 lbs. (10.9~15.9 kg)	160 mg	Little Fevers & PediaCare <i>Infant</i> Fever/Pain Reliever 160 mg/5.0 ml	5 ml	100 mg	<i>Infants'</i> Advil & Motrin & PediCare  50 mg/1.25 ml	2.5 ml Syringe
		© <i>Infants'</i> Tylenol 160 mg/ 1.6 ml	1.6 ml Dropper			

© By early 2012, U.S. drug manufacturers will phase out completely the “more concentrated” form of acetaminophen **160 mg/ 1.6 ml** in preference to **160 mg/ 5.0 ml** as a standard in order to help prevent fatal overdoses/ liver damage in infants.
